Course offerings and teaching methods in academic year 2016-2017

A (semester 2) lecture 30.0 h

Lecturers in academic year 2016-2017

Bacher, Klaus  GE05  lecturer-in-charge
Buls, Nico  VUB  co-lecturer

Offered in the following programmes in 2016-2017

Teaching languages
Dutch, English

Keywords
interaction of radiation, dosimetry, image quality, medical imaging, radionuclide therapy, MRI, lasers

Position of the course
The student learns how a variety of physical principles and laws are applied in medical diagnostics and therapy. The student gets in contact with this research field of sciences in medicine.

Contents

Part I (K. Bacher, UGent)
• Interaction ionizing radiation with matter and tissues
• Applications of ionizing radiation in imaging and therapy
• Basic concepts of radiation dosimetry and radiation protection
• Image quality analysis in X-ray imaging
• Patient dosimetry in X-ray imaging
• Patient dosimetry in nuclear medicine, radionuclide therapy

Part II (N. Buls, VUB):
• MRI Basic physics and imaging
  • Nuclear Magnetic Resonance
  • Image contrast
  • Image encoding and MR sequences
  • Image quality
  • MRI Fast scanning, hardware and image artifacts
  • MRI Flow imaging and spectroscopy
  • MRI safety and siteplanning
  • Lasers in medicine: safety and applications

Initial competences
Basic physics

Final competences
1 Understanding the physical concepts used in medicine for imaging and therapy
2 Applying the principles of radiation dosimetry in different clinical disciplines

(Approved)
3 Understanding the concepts of image quality analysis
4 Being aware of the need for a medical physicist in a hospital environment

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment.

Conditions for exam contract
This course unit cannot be taken via an exam contract.

Teaching methods
Lecture

Learning materials and price
Syllabus, slides

Course content-related study coaching
appointment with the lecturers

Evaluation methods
end-of-term evaluation

Examination methods in case of periodic evaluation during the first examination period
Written examination with open questions, oral examination

Examination methods in case of periodic evaluation during the second examination period
Written examination with open questions, oral examination

Examination methods in case of permanent evaluation

Possibilities of retake in case of permanent evaluation
not applicable

Extra information on the examination methods

Calculation of the examination mark
Part VUB: 40%
Part UGent: 60%
If students score less than 10/20 for one of the components, they can no longer pass the entire course unit. If the total score is a mark of ten or more out of twenty, then this is reduced to the highest failing mark.

(Approved)
