Palaeobiology of Micro-organisms (C001584)

Valid as from the academic year 2017-2018

Course Specifications

Lecturers in academic year 2017-2018
Louwye, Stephen
WE13 lecturer-in-charge
N., N. co-lecturer

Course offerings and teaching methods in academic year 2017-2018
A (semester 1) practicum 30.0 h
lecture 20.0 h

Offered in the following programmes in 2017-2018
Master of Science in Marine and Lacustrine Sciences 5 A
Master of Science in Marine and Lacustrine Science and Management 6 A

Teaching languages
English

Keywords
Palaeobiology, fossil micro-organisms, morphology, evolution, palaeoenvironment, palaeogeography, dating

Initial competences
Knowledge of phycology and protistology.

Final competences
1 Advanced knowledge of the discussed fossil microorganisms and their identification criteria.
2 To possess a fundamental insight in their evolution during the Phanerozoic.
3 Apply this knowlegde to determine palaeoenvironmental parameters and to reconstruct the palaeogeography and palaeoclimatology.

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods
Lecture, practicum

Course size
(nominal values; actual values may depend on programme)

Credits 5.0 Study time 140 h Contact hrs 50.0 h

Teaching methods
English

Position of the course
Knowledge and insight of the most important groups of fossil micro-organisms and their evolution since the Precambrian. Their use as proxies for the reconstruction of the palaeoenvironment, palaeogeography and palaeoclimatic conditions for exam contract

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods
Lecture, practicum
Learning materials and price

References

Course content-related study coaching
Possibility to ask questions about the oral teaching classes by email, via personal contact and during the practical exercises. Guidance during practical exercises by teachers and assistants.

Evaluation methods
end-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period
Written examination with open questions, assignment

Examination methods in case of periodic evaluation during the second examination period
Written examination with open questions, assignment

Examination methods in case of permanent evaluation
Assignment

Possibilities of retake in case of permanent evaluation
examination during the second examination period is not possible

Extra information on the examination methods
Written (theory) and report (practical exercises)

Form and contents of the examination are explained at the end of the course. A test evaluates whether students have internalized the final objectives.

Calculation of the examination mark
Work piece 25%, written exam 75%
