Course Specifications
Valid as from the academic year 2014-2015

Course
Solid State Chemistry (C002562)

Course offerings and teaching methods in academic year 2017-2018
A (semester 2)
practicum 5.0 h
lecture 27.5 h
seminar: coached exercises 25.0 h

Lecturers in academic year 2017-2018
Van Driessche, Isabel WE06 lecturer-in-charge
Hens, Zeger WE06 co-lecturer
Van Der Voort, Pascal WE06 co-lecturer

Offered in the following programmes in 2017-2018

Teaching languages
English

Keywords
Solid state chemistry, synthesis, physical and chemical properties, chemistry of surfaces, analysis techniques

Position of the course
Solid state chemistry is one of the major courses of the master in chemistry program. It is based on a number of courses taught at the bachelor level like chemical thermodynamics and crystallography. The course makes up a starting point for a number of optional courses in the master program. The course gives an overview of solid state chemistry starting with the crystaline structure of solids and finishing with the applications of solids in chemistry. It aims at giving students an understanding in the physical and chemical properties of solids and the solid surface and in the analysis of solid state properties.
The course addresses the following competences: M.1.1, M.1.3, M.1.4, M.2.2, M.2.5, M.3.2, M.3.6, M.4.1

Contents
1. Crystal structures - overview of crystal structures, closed packed structures, common crystals structures of compounds, defects.
2. Synthesis of solids.
4. Physical properties - electrical properties, interaction with light, magnetic properties, thermal properties, mechanical properties.
5. Semi-crystalline and amorphous materials - silica, zeolites.
6. The solid surface - gas adsorption, adsorption-isotherms.

Initial competences
• General chemistry and physics courses at the bachelor level.

(Approved)
• fysische chemie I: chemische thermodynamica.
• kristallografie.
• kwantum chemie.

Final competences
http://www.ugent.be

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods
Lecture, practicum, seminar: coached exercises

Learning materials and price
English language course book. Cost: 15 EUR

References
-

Course content-related study coaching
Interactive support by means of Minerva. Possibility for questions and discussions following each classroom lecture.

Evaluation methods
end-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period
Written examination with open questions

Examination methods in case of periodic evaluation during the second examination period
Written examination with open questions

Examination methods in case of permanent evaluation
Participation, assignment, skills test

Possibilities of retake in case of permanent evaluation
Examination during the second examination period is possible

Extra information on the examination methods

Calculation of the examination mark
The parts refer to the sectioning in the course content
Part 1-2 = 30%
Part 3-4 = 35%
Part 5-6 = 35%
