A (semester 1) English

Lecturers in academic year 2018-2019

Thiebaut, Walter	KUL	lecturer-in-charge
De Man, Philip	KULEU	co-lecturer
Hansen, Rik	KULEU	co-lecturer
Wouters, Jan	KUL	co-lecturer

Offered in the following programmes in 2018-2019

	crdts	offering
<a href="#">Master of Science in Space Studies</a>	5	A

Teaching languages

English

Keywords

Position of the course

The general aim is that all students - irrespective of the nature of their initial master - are able to follow the 'truncus communis' courses at the required academic level of the covered discipline, without the necessity of additional specific introduction for students with different backgrounds. Students with a more technical background, follow a course covering the relevant human sciences, and vice versa. Introductory handbooks and/or basic texts are handed over to the students, well before the academic year formally starts. Guidelines are given with respect to the relevance of different topics for space studies.

The basic format of the course is that the knowledge acquisition occurs through self-study, with regular feedback from senior and junior academic staff.

Contents

Basic principles of Law and Policy  
Basic principles of Business and Management

Initial competences

none

Final competences

The goal is to familiarize students having a background in exact, biomedical and engineering sciences with the methods and paradigms of the human sciences relevant for the space sector.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar

Learning materials and price

Introductory handbooks made available to the students (e.g. Aust, A., Modern Treaty Law and Practice, CUP, 2007)

Introductory texts on topics related to the space sector
