Position of the course

This course addresses the advanced technical and tactical skills in football, team handball, basketball and volleyball according using a game-based approach. This course is based on the course Interactive Movement Activities I. This course aims for fluent team play in specific game-like situations and small-sided games using the appropriate technical and tactical skills. The final intended level is the actual game format for all disciplines (e.g. volleyball: 6 vs 6; basketball: 5 vs 5)

Within the general competence model (of bachelor in physical education and movement sciences), this course contributes to the movement competencies, especially to the interactive movement activities.

To perform the required skills in a satisfactory manner, the student is expected to maintain an adequate level of physical fitness.

Contents

Advanced technical and tactical elements in soccer, basketball, volleyball and team handball (including theoretical underpinnings).

#### Teaching methods

Practicum

#### Extra information on the teaching methods

This course can be followed by incoming (exchange) students. The sessions will be in Dutch, but are easy to follow by non-native speakers due to their practical nature. During the practical sessions the different skills and disciplines are shown and practiced. The theoretical basis of the skills and disciplines and the regulations of the sports are addressed during lectures. Injured students are expected to be present at the practical and theoretical sessions so they don't miss essential information.

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation

Written examination, portfolio, participation, skills test

Possibilities of retake in case of permanent evaluation

examination during the second examination period is possible in modified form

Extra information on the examination methods

- There are a number (3 to 5) of evaluations (of techniques, performance and theory/regulations) during the academical year.
- Attendance to the practical sessions is required. Illegitimate absence in more than 20% of the practical sessions of one sport will automatically result in a FAIL for this course.
- For basketball the student is required to show his practical competences and theoretical insight in a personal portfolio.

Calculation of the examination mark

**Per discipline/sport:** the mark is calculated by weighing the marks for the practical part and the mark for the theoretical part. The relative weight of mark on the practical part (70%) is larger than for the theoretical part (30%). A mark below 9/20 on the practical part or on the theoretical part will be sanctioned at the level of the discipline. In case of a mark < 9/20 for either the theoretical part or the practical part, both parts have to be retaken.

**Total course:** The total mark on this course is the average of the marks for football, handball, basketball and volleyball.

When a student does not take part in one or more of the evaluations, or when the student is illegitimately absent in more than 20% of the practical sessions, he/she is unable to pass this course. If this is the case and if the total mark is > 10/20, the total mark will be adjusted to 9/20.

Addendum

This course is open for incoming mobility students (Erasmus), but students should have sufficient proficiency to take this course. It is not possible to take both I and II.
