Keywords
Clinical clerkship

Position of the course
The student will take part via an active and participating way in the clinical practice of 2 different clinical internships by choice. More information available in the clerkship brochure (cfr MINERVA site). The student will be trained in a number of recurrent and important diseases. This clerkship is a continuum of the previously followed theoretical course and of the previous observational clerkships in which the student succeeded.

Contents
The clerkship includes participation in all aspects of the clinical practice in 2 clinical internships by choice.

Initial competences
The student succeeded in the Bachelor years and all parts of the first two Master years. The student succeeded in the observational clerkships.

Final competences
The student is capable to take the case history of and to examine patients with complaints related to the most important diseases in the chosen disciplines. He/she should be able to set up a specific policy plan and therapy for the patient in question. He/she is able to apply some of the technical skills that are frequently used by the different disciplines (as formulated in the clerkship objectives).

Conditions for credit contract
This course unit cannot be taken via a credit contract

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods

Extra information on the teaching methods
The recurrent pathologies will be mostly taught in a practical way, with the focus on
Continuous assessment during the second examination period is possible.

Participation, job performance assessment

- Relevant written courses from the theoretical instruction
- General clerkship brochure and specific syllabi and reference books related to the discipline
- Electronic sources of information accessible via the biomedical library

Happens by the clerkship supervisor and the clerkship co-ordinator during the daily clinical practice. The clerkship supervisor coaches and evaluates the case presentations the student writes about a patient known by both of them.

Examination methods

Continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation

Participation, job performance assessment

Possibilities of re-take in case of permanent evaluation

Examination during the second examination period is possible

Extra information on the examination methods

Testing of the final objectives via Integrated Clinical Problem Solving – Master’s Dissertation III (see course specifications D002242).

Calculation of the examination mark

In case of unauthorized absence during the clerkship, the obtained score of the clerkship in question will be diminished by 1 point a day of absence. More information available in the clerkship brochure (cfr MINERVA site). De responsible lecturer of the course concerned organizes a supplementary clerkship if this rule results in a score < 10/20 for the student in question.
