Keywords

General psychology

Position of the course

The aim of this course is to offer an introduction in behavioral science and psychology. It wants to give the students a fundament for the courses in the later program and to form an essential element to the development of the universitas.

Contents

Students don't have to possess any previous knowledge about psychology. The course starts with a set of basic principles, after which a number of psychological trends of modern psychology, the functioning of personality and the major domains of psychology are presented.

Initial competences

Level to start higher education

Final competences

- 1 General purposes:  
Integration and reformulation of knowledge and insights at the interface of various domains considering the general cognitive learning outcomes:  
- related to (ortho)-didactic and psychological-pedagogical learning outcomes
- 2 Specific purposes:  
Being able to distinguish between an intuitive judgement of characters and a scientific approach of human behavior.  
Being able to recognize and critically address the major subdisciplines in psychology and to define their important concepts.  
Being able to differentiate between categories of psychopathology and recognize different therapeutic approaches in clinical psychology.
