De Raedt, Rudi
PP05 lecturer-in-charge

Offered in the following programmes in 2018-2019

- Master of Science in Psychology (main subject Clinical Psychology) 30 A

Teaching languages

Dutch

Keywords

clinical practice, clinical setting, behaviour therapy, systemic therapy, developmental disorders, health psychology, case conceptualisation

Position of the course

This course offers a large exercise in integration by both broadening and deepening of all gained knowledge and skills in the clinical psychological field (block 5: professional field integration). The emphasis is on application and integration, and is done on the basis of the internship follow-up and the internship report. The introduction takes place in the course law, documentation and organization of care (block 4). This course builds on knowledge, insights and skills concerning the models (block 2), assessment (block 3) and interventions (block 4) in clinical psychology.

Contents

The learning content builds upon the formal training of students in the Bachelor and Master program of Psychology, option Clinical Psychology.

During a clinical internship the student:
- engages in a fruitful confrontation between his/her theoretical background, ethical attitudes and the professional field.
- enrolls partially or fully in the tasks and responsibilities of the psychologist-mentor.
- gets acquainted with the different aspects of the work of a clinical psychologist, and also accomplishes a number of these tasks.
- learns to function within a centre or an organisation. This includes acquiring insight in the general objectives and the related procedures and policies, in the organisational network, and in the position and function of the centre/organisation within the health care and/or welfare domains.

Initial competences

To check if there is any succession on this course, please refer to [www.ugent.be/pp/nl/diensten/fdo/git](http://www.ugent.be/pp/nl/diensten/fdo/git).

Final competences

1. Identifying and explaining clinical disorders through different developmental phases in patients.
2. Defining, framing, and demonstrating implications for individual clients/client systems of theoretical constructs in theoretical models.
3. Staying acquainted with recent developments in the domain
