

Fish and Shellfish Immunology (I002085)

Course size (nominal values; actual values may depend on programme)

| | | | | | |
|---------|-----|------------|-------|-------------|--------|
| Credits | 4.0 | Study time | 120 h | Contact hrs | 45.0 h |
|---------|-----|------------|-------|-------------|--------|

Course offerings and teaching methods in academic year 2018-2019

| | | | |
|----------------|---------|---------|--------|
| A (semester 1) | English | lecture | 45.0 h |
|----------------|---------|---------|--------|

Lecturers in academic year 2018-2019

| | | |
|------------------|------|--------------------|
| Vanrompay, Daisy | LA22 | lecturer-in-charge |
|------------------|------|--------------------|

Offered in the following programmes in 2018-2019

| | | |
|--|-------|----------|
| Master of Science in Aquaculture | crdts | offering |
| | 4 | A |

Teaching languages

English

Keywords

Antigens, immune organs of fish, inflammation, key cells of innate immunity in fish, cell based innate immune sensing in fish, cellular effectors in fish, humoral-based immune sensing in fish, cytokines, chemokines, MHC of fish, antigen presentation in fish, T and B cell response in fish, immunoglobulins of fish, key cell types of innate immunity in shellfish, pathogen recognition receptors of shellfish, the proPO system in shellfish, coagulation in shellfish, anti-viral mechanisms in shellfish

Position of the course

This course aims at providing a detailed overview on immunology of fish and shellfish.

Contents

- 1 History of immunology
- 2 Antigens
- 3 Immune organs of fish
- 4 Inflammation
- 5 Innate immunity
- 6 Key cells
- 7 Cell based innate immune sensing fish
- 8 Cellular effectors in fish
- 9 Humoral-based immune sensing in fish
- 10 Cytokines and chemokines
- 11 MHC in fish
- 12 Ag presentation
- 13 T cell response in fish
- 14 Immunoglobulines of fish
- 15 B cell response in fish
- 16 Hemocytes in shellfish and tissues of their immune system
- 17 PRR of shellfish
- 18 ProPO in shellfish
- 19 Coagulation in shellfish
- 20 Anti-viral mechanisms in shellfish

Initial competences

General biology, microbiology, basic knowledge on aquaculture.

Final competences

- 1 The student has knowledge on general principles of immunology in both fish and shellfish.
- 2 The student has knowledge on the innate immunity in fish and shellfish.
- 3 The student has knowledge on the adaptive immunity in fish.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Lecture

Extra information on the teaching methods

Theory lectures: lectures based on powerpoint presentations.

Learning materials and price

Syllabus (English). Estimated price 15 euro.

Course content-related study coaching

Teacher available for student counselling

Evaluation methods

end-of-term evaluation

Examination methods in case of periodic evaluation during the first examination period

Written examination

Examination methods in case of periodic evaluation during the second examination period

Written examination

Examination methods in case of permanent evaluation

Possibilities of retake in case of permanent evaluation

not applicable

Extra information on the examination methods

Theory: written examination

Calculation of the examination mark

Out of 20:

20 points attributed to written exam

Students who eschew period aligned evaluations for this course unit may be failed by the examiner.
