Contents

Initial competences

Final competences
1. To further explore the complexity of a specific subject in one’s own archaeological research and practices.
2. To have advanced insight into the archaeological terminology in order to analyse and assess new and complex ideas.
3. To apply human and natural sciences in research or in professional activities (multidisciplinarity).
4. To critically apply international, archaeological and scientific literature in an original and substantiated manner.
5. To autonomously discover dynamics, processes or recurrences in complex historical and archaeological situations.
6. To assess historical issues and theories in a value-conscious and differentiating way.
7. To act with integrity, to display a scientific (archaeological) curiosity and a lifelong learning attitude, and to have a critical mind.
8. To write a high-quality document about one’s own archaeological research.
9. To present and substantiate one’s own archaeological research to experts, peers and non-experts.
10. To communicate, collaborate and act in an appropriate, inspiring, advisory and authoritative manner.
