Teaching languages

- English

Keywords

- Localisation, software localisation, website localisation, game localisation, localisation of e-learning

Position of the course

(Proposal)
In the translation industry, the term localisation refers to the adaptation and translation of software, games and websites. Recently, e-learning has been added to this list. The process involves more than just translating, and also comprises tasks such as adjusting layout, graphics, help programs, time indications, etc. Specialized localization tools such as Passolo and Alchemy Catalyst support the localization process.

Contents
The course deals with the following topics:
• introduction to the main concepts of localisation;
• technical aspects of localisation (a.o. internationalisation, encoding, support of different formats);
• cultural aspects of localisation;
• localisation of software programs and online help files;
• localisation of websites;
• localisation of games;
• localisation of e-learning.

Initial competences
The student has a basic knowledge of English and a basic knowledge of at least one of the following languages: Dutch, French or German.

Final competences
1 having advanced knowledge of the localisation process and, based on that knowledge, critically assessing localisation technology tools;
2 localising digital contents (software applications including user interfaces and online help files, websites, games and e-learning);
3 during the translation process, making use of terminological resources (a.o. the Microsoft Language Portal), style guides and specific localisation tools;
4 having advanced knowledge of the specific technical and cultural aspects of localisation.
5 having a basic understanding of HTML code (HTML elements and attributes, structure of an HTML document)

Conditions for credit contract
This course unit cannot be taken via a credit contract

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods
Practicum, self-reliant study activities

Extra information on the teaching methods
Seminars in the computer lab
Guided self-study in the computer lab or at home

Learning materials and price
Handouts and materials on the electronic learning platform Ufora

Estimated total cost: 0 EUR
