Postgraduate Certificate General Dental Practitioner

Teaching languages
Dutch

Keywords
General dentist, Clinical clerkship, Internship, "Accentstage"

Position of the course

The postgraduate training "Bijzondere Beroepstitel Algemeen Tandarts" is an interuniversity programme which consists out of the following modules:

- theoretical courses (Truncus Communis partim basic obligatory programme and Truncus Communis partim elective programme).
- clinical clerkship (Partim aanvangstage, partim vervolgstage, partim accentstage)
- seminars
- dissertation

The clinical clerkship allows the student to be trained in an integrated approach for an autonomous independent general dental practice setting with the possibility to put emphasis.

Position of the course:

- Be able to plan and execute all types of treatment modalities in an integrated approach for an autonomous independent general dentistry practice setting.
- Be able to control all clinical, administrative and management aspects of a private practice under supervision of a qualified supervising dentist.
- Be competent in recognizing limitations in clinical practice and refer accordingly.
- Be competent in organisation and executing treatment plans and coordination of dental care in the local dental health care system of community and hospital service.

In order to achieve this excellence the clinical clerkship contains the following stages: "aanvangstage", "vervolgstage" and "accentstage".

Contents

To draw up patient files and map and execute autonomous treatment plans for a sufficient number of treatment acts in the field of prevention and oral rehabilitation in a general dental practice.

All fields for which proficiency was obtained during the Bachelor/Master education have to be covered.

The selection of self-conducted clinical activities in patient is done in the spirit of selfjudgement and the concept of referral to colleagues with special proficiencies.

To plan and coordinate a complete oral rehabilitation for his/her patient with integration of own clinical acts in harmony with other (referred to) dental disciplines in second and third level of care.

The clerkship "aanvangstage" emphasizes the execution of a wide scale of clinical acts in the domain of general dentistry in harmony with other dental disciplines and under
guidance of the supervising dentist.

The "accentstage" clinical clerkship implies that the student can choose to put more emphasis on a specific field of dentistry in which he/she has chosen a supervising dentist in that specific field. This can vary from officially recognized specialties like periodontology and/or orthodontics or scientific specialties like pedodontics, TMDysfunctions, Prosthodontics, endodontics, gerodontology, dental imaging, etc.

Initial competences

Full knowledge of all competences achieve in the Bachelor/Master education for "Tandarts".
Knowledge of referral on all levels of dental disciplines.
Knowledge of contemporary treatment strategies and their prognosis.
In-depth knowledge of patient-doctor communication

Final competences

Running autonomous unsupervised general dental practice according to the "state of the art".

Learning materials and price

Manuals and guides for equipment and software.
Library

References

Course content-related study coaching

Information sessions with the supervising dentist throughout the whole year of internship.
During the obligatory weekly interaction between supervising dentist and student, treatment modalities, all possible questions and constructive feedback has to be given. Throughout the year the student notes all activities in a book. The frame of this book is available on the website www.health.fgov.be.

Evaluation methods

Continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation

Possibilities of retake in case of permanent evaluation

examination during the second examination period is possible in modified form

Extra information on the examination methods

Continuous evaluation and guidance by means of a clerkshipbook were all clinical acts, courses, seminars, reports and evaluation are assembled.
Information sessions with the supervising dentist throughout the whole year of internship are noted and signed.
During the obligatory weekly interaction between supervising dentist and student, treatment modalities, all possible questions and constructive feedback has to be given. Throughout the year the student notes all the clinical activities in a book, which are evaluated by the supervising dentist on a monthly basis. The frame of this book is available on the website www.health.fgov.be.

Calculation of the examination mark

Score (20) given by the supervising dentist(s).
When the student has more than one supervising dentist, the score is calculated according the number of hours internship per supervising dentist.
The student is responsible to send in the "evaluatieblad van de stagiair door de
stagemeester" in time. In case of failure, an extra internship will be proposed by the "erkenningscommissie Algemeen Tandarts".
