Course offerings and teaching methods in academic year 2019-2020

A (year) Dutch practicum 30.0 h

Lecturers in academic year 2019-2020

De Raedt, Rudi PP05 lecturer-in-charge
Barnes-Holmes, Yvonne PP05 co-lecturer

Offered in the following programmes in 2019-2020

| Master of Science in Psychology (main subject Clinical Psychology) |
|------------------|------------------|
| 7                | A                |

Teaching languages

Dutch

Keywords

behaviour therapy interventions, clinical skills, evidence-based

Position of the course

The course is an in-depth seminar within the block “intervention (block 4)”, related to “Internship and Ethics” (complementary to block 5: integration into the work field). The aim of this course is to learn students how to think and act based on empirical findings with regard to interventions (see block 1: evidence-based; block 3: assessment), based on conceptual frameworks (theory-driven, see block 2: models in clinical psychology; and case conceptualisation, see block 3: assessment), on specific individual/group characteristics (person based, see block 3) and on professional quality criteria (role of the psychologist; see block 3). This requires abilities to integrate and adopt knowledge and skills from previous blocks as well as acquire new knowledge and skills.

Contents

The student chooses one group out of two: children and adolescents, or adults. In each group age specific problem areas are selected and the student learns by means of demonstrations and supervised practice to formulate a treatment plan and to know and use specific treatment techniques.

For the group ‘children and adolescents’ this consists of: treatment methods for anxiety disorders, depression, conduct disorder, developmental disorders, and psychosomatic complaints.

For adults: anxiety disorders, depression, addiction, mourning, personality disorders and psychotic disorders are considered.

Treatment methods include: relaxation, operant techniques, exposure, cognitive techniques and psycho-education, Acceptance and Commitment Therapy. Relevant psychodiagnostic instruments and evaluation instruments are discussed.

Initial competences

Behaviour Therapy

Final competences

1. Knowing specific intervention methods in behaviour therapy and applying them in a correct way within treatment.
2. Choosing an intervention based on scientific evidence.
3. Assessing a situation in order to formulate a diagnosis as a working hypothesis.
4. Designing and operationalizing an intervention plan and intervention methods.
5. Communicating psychology related knowledge and insights.
6. To stimulate the active participation of the client in diagnosis and intervention.
7. Dealing with clients’ singularity and particularities.

(Approved)
8 Establishing an emphatic therapeutic relationship.

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment.

Conditions for exam contract
This course unit cannot be taken via an exam contract.

Evaluation methods
end-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period
Written examination with open questions, open book examination

Examination methods in case of periodic evaluation during the second examination period
Written examination with open questions, open book examination

Examination methods in case of permanent evaluation
Participation, assignment

Possibilities of retake in case of permanent evaluation
examination during the second examination period is not possible

Extra information on the examination methods
Specific assignments during practicals: preparing and presenting an intervention
Written exam: analysis of a case study, with open questions
Feedback on the non-periodical evaluation: oral during the exercises.

Calculation of the examination mark
A combination of end-of-term assessment (80%) and continuous assessment (20%). Participation in all parts is required.
Partial results for which the student scored at least half of the points, can be transferred to the next examination period within the same academic year. Partial results will never be rounded.
Students who eschew one or more parts of the evaluation can no longer pass the course. Final scores will be reduced to the highest non-deliberative quotation (7/20) in case the final score is higher.
The final score is the weighted average of the components of the evaluation. Students can only pass for this course if they achieve a minimum of 10/20 for each component.
When students obtain less than 10/20 for at least one of the components, the following rules apply:
- 8/20 or 9/20 for at least one of the components: the student can no longer pass the entire course unit: if the total score is a mark of ten or more out of twenty, then this is reduced to the highest failing mark (9/20).
- less than 8/20 for at least one of the components, the student can no longer pass the entire course unit: if the total score is a mark of eight or more out of twenty, then this is reduced to the highest non-deliberative mark (7/20).
