Lecturers in academic year 2019-2020

Soenens, Bart    PP07    lecturer-in-charge
Beyers, Wim      PP07    co-lecturer
Brenning, Katrijn PP07    co-lecturer

Offered in the following programmes in 2019-2020

Bachelor of Science in Psychology (main subject Clinical Psychology) 5 A
Bachelor of Science in Psychology (main subject Education) 5 A
Bachelor of Science in Psychology (main subject Personnel Management and Industrial Psychology) 5 A
Bachelor of Science in Psychology (main subject Theoretical and Experimental Psychology) 5 A
Bachelor of Arts in Moral Sciences 5 A
Bachelor of Arts in Philosophy 5 A
Joint Section Bachelor of Science in Psychology 5 A
Linking Course Master of Science in Psychology (main subject Clinical Psychology) 5 A
Linking Course Master of Science in Psychology (main subject Personnel Management and Industrial Psychology) 5 A

Teaching languages

Dutch

Keywords

Classical developmental psychology, developmental stages, developmental theories, research methodology, physical development, cognitive development, emotional development, social development

Position of the course

This course provides a broad introduction to the domain of developmental psychology. Central to this course is a discussion of different views on human development, classical theories of developmental psychology and methodology specific to the domain of developmental psychology. Further, this course provides an age-bounded overview of developmental tasks and milestones encountered by people throughout the lifespan. This course contributes mainly to Block 2 (Models in psychology) in the psychology program and to the building block ‘Psychological models’ in particular. This course also provides a basis for two more specialized courses in developmental psychology: Recent theories on developmental psychology (H002118) and Lifespan psychology (H002130).

Contents

This course covers the following topics:
• General introduction to the domain of developmental psychology
• Lifespan perspective

(Approved)
• Classic and contemporaneous theories of developmental psychology
• Methodology of research in developmental psychology
• Features of normal development from infancy to late adulthood
• Physical development (e.g., motor skills and brain development)
• Cognitive development (e.g., information processing and moral development)
• Emotional development (e.g., recognition of emotions and emotion regulation)
• Social development (e.g., attachment and relations with peers)

Initial competences

Final competences

1 To understand and compare theories and their underlying anthropological assumptions
2 To situate developmental skills and phenomena on a timeline across the lifespan
3 To understand the interplay between developmental skills and phenomena within the different developmental periods
4 To relate, to situate and to demonstrate implications of theoretical concepts
5 To illustrate and translate theoretical concepts to daily life
6 To be acquainted with the recent developments in the domain
7 To understand the advantages and disadvantages of several methods in research on developmental psychology
8 To analyse and to interpret research results and to relate them to the original research question.
9 To report and to present research and research results.
10 To collaborate with colleagues and personnel

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in ‘Starting Competences’

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Group work, lecture, seminar, lecture: plenary exercises

Extra information on the teaching methods

- The lectures involve discussion and explanations of (developmental) theory. A number of small assignments and exercises are held during the lectures.
- As for the exercises, students can choose between one of (at least) three developmental themes that are discussed in the lectures and that are studied more thoroughly during the sessions. Students receive exercises that are solved in an interactive fashion with the research assistant. Furthermore, guided by a research assistant, students work on a group paper in small groups, thereby reporting on the findings of a small developmental study with children, adolescents, or adults.
- Attendance at the exercises is mandatory because cooperation during the group assignment can be hindered by the absence of students. Attendance at the lectures is optional yet recommended (to better understand the content of the course).

Learning materials and price

• Additional slides (via Minerva).

Estimated cost: 80 EUR

References

Course content-related study coaching

• Interactive support using Minerva.
• By appointment.

Evaluation methods

end-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period

(Approved)
Written examination with multiple choice questions

Examination methods in case of periodic evaluation during the second examination period

Written examination with multiple choice questions

Examination methods in case of permanent evaluation

Assignment

Possibilities of retake in case of permanent evaluation

Examination during the second examination period is possible

Extra information on the examination methods

Details on periodic evaluation: the written exam has 45 to 50 multiple choice questions.
Each question has 4 alternative responses, only one of which is correct.

Details on permanent evaluation:
• Method: The paper is a report discussing the students' answers on a clearly
delineated set of questions dealing with the group assignment. The paper is
evaluated in terms of both substantive and formal qualities.
• Frequency: the paper is evaluated once (after it is finished)
• Description of second exam chance for permanent evaluation: a slimmed down
version of the (group) paper, thereby receiving guidance from a teaching assistant.
• Feedback for permanent evaluation: exercise assistants can be contacted by
appointment to get individualized feedback.

Calculation of the examination mark

A combination of periodic evaluation (80%) and permanent evaluation (20%).
Students who eschew one or more parts of the evaluation can no longer pass the
course. Final scores will be reduced to the highest non-deliberative quotation (7/20) in
case the final score is higher.

Students who did not pass the course can transfer only the partial result of the
permanent evaluation (the exam) but not the result of the periodic evaluation (the
paper), to the next examination within the same academic year.
