Lecturers in academic year 2019-2020

Van Hoorick, Geert	RE22	lecturer-in-charge
--------------------	------	--------------------

Offered in the following programmes in 2019-2020

	crdts	offering
Master of Science in Bioscience Engineering: Agricultural Sciences	3	A

Teaching languages

Dutch

Keywords

law, agrarian, agricultural lease, country planning, land consolidation, environmental permits

Position of the course

To gain an insight into the basic juridical rules concerning the exploitation of a farm, and that part of agrarian law that is important for the bio-engineer.

Contents

Situation of agrarian law in the context of law.
 Agriculture and private law, from the founding of the farming business till the end thereof (i.a. matrimonial law, different types of association in general, agricultural association, agricultural lease, preemption right, liability, succession law).
 Agriculture and public law, in particular spatial administrative law (i.a. expropriation, country planning, land consolidation, heritage), and agrarian environmental law (i.a. environmental permit, water management, soil, waste and animal waste, manure, and nature conservation).

Initial competences

None required

Final competences

Students should have gained an insight into the basic juridical rules concerning the exploitation of a farm, and that part of agrarian law that is important for the bio-engineer (spatial administrative law and agrarian environmental law).
