Position of the course
This introductory course is intended to familiarize students with the basic skills necessary for independent historical research. This class interacts closely with the Practical History I courses (from among which each student must select one). The skills developed lay the groundwork for the various Practical History courses and, ultimately, the master’s thesis.

Contents
- Learning how to develop a good research question
- Learning how to develop a good search strategy via the use of printed and online bibliographies, repertories and databanks
- Learning how to develop an adequate critical apparatus (footnotes, source overview, and bibliography)
- Learning about scientific communication (reading and writing)
- Becoming familiar with archives and research libraries

Initial competences
No specific prior knowledge is required. However, the students may be asked to take a preparatory exam in order to determine their own level.

Final competences
1 Be able to formulate a research question

(Approved)
2. Be able to collect sources and literature in a scientifically valid fashion.
3. Be able to put together a critical apparatus.
4. Be able to write – in competent Dutch – abstracts and short reviews of scientific articles in Dutch and English.
5. Know how archives and libraries function and be able to use them to obtain the right information.
