Position of the course
- This basic course offers an introduction to the history of the sciences from Greco-Roman antiquity to the Renaissance (c. 500 BCE -1600 CE).

Contents
- On the basis of a study of different scientific disciplines (astronomy, astrology, natural philosophy, medicine, etc.), we investigate the relation between science and its political, social, and cultural context. *Longue durée* developments are also considered.

Initial competences
- No prior knowledge of mathematics and science is required. Nor is any knowledge presupposed of Latin or Greek.

Final competences
1. Having insight in basic philosophical, sociological and historical approaches to science
2. Having knowledge of some of the main scientific achievements from the period 500 BC-1600 AD.
3. Being able to situate the Greco-Roman scientific disciplines and their successors in their specific political, social, or cultural context.
4. Having insight in the main differences, both in terms of content and methodology, between these disciplines and their contemporary equivalents.
5. Being able to read premodern scientific texts in a historical-contextual manner.
