Lecturers in academic year 2020-2021

Mertes, Heidi	LW01	lecturer-in-charge

Offered in the following programmes in 2020-2021	crdts	offering
Master of Science in Teaching in Science and Technology (main subject Biology)	3	A
Master of Science in Biology	3	A
Exchange Programme in Biology (master's level)	3	A

Teaching languages

English

Keywords

Bioethics, Applied Ethics.

Position of the course

The aim of this course is to introduce fundamental ethical approaches and common arguments in bioethical debate, and to encourage students to identify and critically analyse ethical questions related to the life sciences.

Contents

An overview will be given of the most important theories in normative ethics: consequentialism and utilitarianism, and deontological ethics.
Starting from concrete ethical issues related to the students' research interests, the students will learn to identify and analyse controversial ethical questions arising from developments in the life sciences. During the lectures students will be encouraged to think critically about ethical issues and to develop well argued positions.
Part of the course will involve discussion on recent discoveries/ technologies/developments that raise ethical concern. These discussions provide an opportunity for the students to apply the skills that are acquired during the lectures.
Examples of topics included in the lectures and discussions:

- Introduction to bio-ethics
- Ageing - prolonging life
- Research animals
- Human research subjects
- GMO's
- Dual use dilemma
- Stem cell research and patents
- Neuromodulation and enhancement
- Genomics

Initial competences

- Good knowledge of English is required
- Analyse abstract and concrete problems
- Reflect critically
- Communicate a personal stance

Final competences

1 Acquire knowledge of and insight in the crucial differences between the most important argumentation frameworks in normative ethics.
2 Formulate ethical issues from different approaches and advance a well argued position on these issues.
3 Develop and communicate a well-argued ethical view regarding the impact of the life sciences and its scientific and technological developments on society and the global world.
4 Develop and communicate a well-argued ethical view regarding the value of the life sciences and scientific and technological developments for society.
5 Acquire knowledge to act in accordance with ethical research principles and internationally accepted ethical guidelines while engaging in research and associated professional activities.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Lecture, seminar, online lecture

Extra information on the teaching methods

- texts in preparation of class (individual work)
- lectures (on campus or online)
- guided discussions in group (seminars)

Learning materials and price

Philosophical articles, scientific publications related to the discussed topics; extracts of reports from bioethics committees, slides
Cost: 0 EUR
