

Urbanization in Global Perspective (C003532)

Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course size	<i>(nominal values; actual values may depend on programme)</i>			
Credits 5.0	Study time 150 h	Contact hrs	52.5 h	
Course offerings and teaching methods in academic year 2020-2021				
A (semester 1)	English	Gent	guided self-study	22.5 h
			lecture	30.0 h
B (semester 1)			lecture	30.0 h
Lecturers in academic year 2020-2021				
Derudder, Ben		WE12	lecturer-in-charge	
Offered in the following programmes in 2020-2021			crdts	offering
Master of Science in Teaching in Science and Technology (main subject Geography)			5	A
Master of Science in Teaching in Science and Technology (main subject Geography and Geomatics)			5	A
Master of Science in Teaching in Social Sciences (main subject Sociology)			5	A
Master of Science in Engineering: Architecture (main subject Architectural Design and Construction Techniques)			3	B
Master of Science in Engineering: Architecture (main subject Urban Design and Architecture)			3	B
Master of Science in Geography and Geomatics			5	A
Master of Science in Geography			5	A
Master of Science in Urbanism and Spatial Planning			3	B
Master of Arts in Global Studies			5	A
Master of Science in Sociology			5	A
Exchange programme in Geography and Geomatics (master's level)			5	A
Exchange Programme Urbanism and Spatial Planning			3	B
Exchange Programme in Political and Social Sciences			5	A

Teaching languages

English

Keywords

Urbanization, world cities, migration, slums, housing, socio-economic evolutions, London, China, Rio de Janeiro, Dubai

Position of the course

This course aims to provide both an overview of, and insight in contemporary urbanization processes. A summary of the main global trends is provided, and case studies are used to enliven the curriculum. Specific attention is paid to the most important theoretical perspectives on the contemporary role of, and the major socio-economic evolutions within cities.

Contents

In addition to a general overview of recent trends in urbanization processes, the following set of topics will be addressed:

- The relevance and nonrelevance of concepts such as 'the urban age'
- An integrated network of world cities as an alternative for the inter-state system?
- Living in the global city: work, migration, and housing

- Comparative urbanisation: how can urban processes be compared?
- Urban policy mobilities
- Urbanization and the spread of infectious disease
- The largest migration in history: the Chinese urban boom
- The authoritarian creation of urban 'dreams': Dubai, Inc.
- A 'planet of slums'? The meaning of favelas in Rio
- The decentralisation of urban centrality: urbanisation, suburbanisation, polycentric urban regions

Initial competences

Basic knowledge of urban geography, urban sociology, or urban economics

Final competences

- 1 Knowledge about the main urbanization processes and patterns from a global perspective.
- 2 Insight in the way in which evolutions in technology and the economy give rise to new settlement systems.
- 3 Insight in the way in which these evolutions are actively facilitated and underpinned by social and political processes.
- 4 Insight in the way in which these evolutions give way to changing patterns of work, migration, and housing.
- 5 Insight in the urban boom in the Gulf region, China and the 'Global South'.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Guided self-study, lecture, online lecture

Extra information on the teaching methods

Theory: lectures (on campus and/or online)

Guided self-study: on campus and/or online guidance to help preparing papers

Learning materials and price

Reader with the main literature used during the lectures will be made freely available via the electronic learning platform. Slides are made available via the electronic learning platform

Evaluation methods

end-of-term evaluation

Examination methods in case of periodic evaluation during the first examination period

Oral examination

Examination methods in case of periodic evaluation during the second examination period

Oral examination

Examination methods in case of permanent evaluation

Assignment

Possibilities of retake in case of permanent evaluation

examination during the second examination period is possible

Extra information on the examination methods

Periodical: Oral examination with written preparation, questions aimed at testing a student's overall insight.

Non-periodical: Paper in two parts in which the student reflects about comparability of urban processes.

Calculation of the examination mark

2/3rd periodical and 1/3rd non-periodical

However, the student needs to pass both the periodical and the non-periodical part to be able to pass for the course at large: if according to the calculations of the final score he/she receives a score ≥ 10 but thereby receives a score < 10 for one of the two parts,

(Approved)

then he/she receives an overall score of 9 and is referred to the next exam period for the part for which he/she did not score ≥ 10 .
