

Internship 2 (C004190)

Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course size (nominal values; actual values may depend on programme)
Credits 5.0 Study time 150 h Contact hrs 12.5 h

Course offerings in academic year 2020-2021

A (year)	Dutch	Gent

Lecturers in academic year 2020-2021

Lecturer	WE12	lecturer-in-charge
Goossens, Rudi		

Offered in the following programmes in 2020-2021

Programme	crdts	offering
Master of Science in Geography and Geomatics	5	A

Teaching languages

Dutch

Keywords

Practice, entrepreneurship, professional environment, geography, geomatics/surveying.

Position of the course

The aim of this course is to bring the theoretical knowledge in each of the fields of geomatics or geography further into practice.

Contents

Twenty days of practical training, on-site, preferably outside Ghent University, which allows to bring the complex theoretical knowledge in the field of geomatics or geography into practice. This implies that at least in one field of geomatics (geodesy, GIS, informatics, surveying, photogrammetry, remote sensing, satellite positioning, real estate, landscaping, social-economic geography, physical geography, ...) important, scientifically relevant and complex skills have to be developed (in open air or not), within a private company or government organisation.

Initial competences

The student has completed or is finishing internship 2.

Final competences

- 1 Through contact with a professional environment, the student has broadened his horizon, he / she has come into direct contact with the needs of the professional world or with new scientific perspectives. This allows him / her to complete the Master in Geography/Geomatics with a higher maturity.
- 2 The students can function in work situations. Moreover, they can contribute to working in a professional environment and they can implement other / new techniques and ideas and they can develop problem-solving strategies.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Work placement

Extra information on the teaching methods

Internship

Learning materials and price

Specifically dependent on the nature of the internship. Guidelines regarding the preparation of the internship report are available.

References

Standard literature is available in the library of the department.

Course content-related study coaching

Supervision is done in consultation between the internship supervisor of the host institution and the subject specialist and the study supervisors of the Geography department.

Evaluation methods

continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation

Oral examination, report

Possibilities of retake in case of permanent evaluation

examination during the second examination period is possible

Extra information on the examination methods

Evaluation of the written report of the training, whereby the report itself as well the content of the training and of the presentation will be evaluated.

Calculation of the examination mark

- An average is made of the three aspects:
- assessment of the internship supervisor
 - the report
 - the presentation.

Facilities for Working Students

- Option to submit the written report and to give the presentation on a different moment during the academic year.
- Option for feedback, in mutual agreement, during or outside the usual office hours.
