Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ulora.

Lecturers in academic year 2020-2021
- Bogaerts, Wim
- Clemmen, Stéphane

Offered in the following programmes in 2020-2021
- Bridging Programme European Master of Science in Photonics: 4 credits, A offering
- European Master of Science in Photonics: 4 credits, A offering

Teaching languages
- English

Keywords
- research, photonics

Position of the course
Through this course the student will be confronted with a number of recent topics in photonics through external and internal experts who present their research or work (in English). Guest lecturers from companies will expose the student to the application of photonics in industry. Furthermore, each student is expected to study one topic in more detail based on scientific articles and give a seminar in English for his fellow students. During this course, the student will be able to hone his oral and written communication skills.

Contents
- Seminars: Seminars by external speakers, internal speakers and students
- Visits: company visits, conference visits
- Methodology: creating a bibliography, presentation techniques

Initial competences

Final competences
1. Being able to study a recent trend in photonics in an independent and critical manner.
2. Being able to handle large quantities of new information.
3. Being able to create a reliable reference list.
4. Being able to give an accessible talk for non-specialists.
5. Being able to write a short document summarising a recent trend.

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract
This course unit cannot be taken via an exam contract

Teaching methods
- Lecture, project
Learning materials and price
