Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course offerings and teaching methods in academic year 2020-2021

A (semester 2) English Gent

- Seminar: practical PC room classes 2.5 h
- Excursion 5.0 h

Lecturers in academic year 2020-2021

- Strubbe, Filip TW06 lecturer-in-charge
- Khelifi, Samira TW06 co-lecturer

Offered in the following programmes in 2020-2021

- Bridging Programme European Master of Science in Photonics 4 A
- European Master of Science in Photonics 4 A

Teaching languages

- English

Keywords

- Photovoltaics, solar energy, sustainable energy

Position of the course

To get familiar to solar energy and its conversion to electrical work, by means of the photovoltaic effect. Ecologic advantages of sustainable energy. Positioning of the sustainable energies within a broader thermodynamic context.

Contents

- Availability of solar energy
- Thermal conversion
- Principles of photovoltaic conversion
- Realistic efficiency
- Classical silicon solar cells (mono and polycrystalline)
- Amorphous solar cells
- GaAs solar cells
- Heterojunction solar cells
- Ecology and economy

Initial competences

- Basics of thermodynamics, quantumphysics, solid-state physics, semi-conductor physics, diode theory

Final competences

1. INSIGHTS: Understanding the basic principles of photovoltaic energy conversion. Understanding the limitations of realistic solar panels.
2. INSIGHTS: The ecological benefits of sustainable energy. Understanding the efficiency and limitations of photovoltaic and thermal energy conversion.
3. PROFICIENCIES: Calculations of the available solar energy.
4. PROFICIENCIES: Calculations of the conversion and the conversion efficiency of solar energy.
Access to this course unit via a credit contract is determined after successful competences assessment.

Conditions for exam contract
    This course unit cannot be taken via an exam contract

Teaching methods
    Excursion, lecture, seminar, seminar: practical PC room classes

Learning materials and price
    course notes

Course content-related study coaching

Evaluation methods
    End-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period
    Written examination, oral examination

Examination methods in case of periodic evaluation during the second examination period
    Written examination, oral examination

Examination methods in case of permanent evaluation
    Report

Possibilities of retake in case of permanent evaluation
    Examination during the second examination period is possible

Extra information on the examination methods
    During examination period: written closed-book exam; oral closed-book exam
    Non-period-bound evaluation: computer practicum with report

Calculation of the examination mark
    Period-bound evaluation: written+oral examination: 80%
    Non-period-bound evaluation: report computer practicum: 20%

(Approved)
