English

Keywords

Management, strategy, business plan, financials, marketing & sales, operations, investment analysis, entrepreneurship, innovation, R&D, patent and intellectual property.

Position of the course

The course aims to provide students insights in the functioning of an enterprise. Hereby, the different sub aspects of an enterprise are covered. The theoretical basis is enforced by exercises and practical evidence. Further, innovation and Intellectual Property are of crucial importance to the current economy, industry and the sustainability and growth of enterprises. This introduction will cover the basic principles of Intellectual Property, which will provide the students a preliminary insight on how industry approaches innovation and Intellectual Property.

Contents

Each part covers theory and exercises/applications:

Management and Entrepreneurship

1. Innovation and creativity
2. Strategy and planning process
3. R&D and management
4. Project management and portfolio management
5. Marketing plan and sales plan
6. Operational management
7. Financial management (cost calculation, balance sheet, P&L, ratios,..)
8. Investment analysis
9. Human resources and leadership

Intellectual property

An overview on innovation and R&D will be given in order to situate the important aspect of IP in the total process. This course will provide a preliminary answer to

questions such as:

1. What is IP?
2. What is Freedom to Operate?
3. How do I develop and identify new IP?
4. How can I protect new IP?

Initial competences

General economics and maths/calculus (Bachelor level) .

A dynamic and creative researcher who wants to know how novel his/her ideas actually are and if indeed novel, how these ideas/technology/products can be protected. Young scientists who are considering a career in industry.

Final competences

- 1 After having followed the course students are expected to;
 - Have knowledge of management principles and techniques used in enterprises
- 2 - Have a basic understanding about how industry manages innovation, research and development, and more in particular Intellectual Property.
