Situering

This course aims at giving an overview of international and European law on the conservation of marine and aquatic biodiversity. Specific attention is given to the ethical foundation of nature conservation, the conservation and management of marine and aquatic protected areas and the protection of marine species.

Inhoud

- 1 Environmental ethics
- 2 General introduction on biodiversity law: institutional context of international biodiversity law, sources of biodiversity law, legal regime of marine and aquatic natural resources, concepts and measures in nature conservation
- 3 Marine and aquatic protected areas: overview of international, European and national law on marine/aquatic protected areas (legal possibilities for the designation and management of protected areas)
- 4 Species protection: overview of international and European law on the exploitation of marine species (international trade, migratory species, specific protection of marine mammals, fisheries)

After this overview, all students are asked to give an oral presentation in small groups on a topic relating to marine or aquatic biodiversity law (on a topic of their choice).

Begincompetenties

- 1 No basic knowledge is required.
- 2 To have the attitude to be willing to develop a critic, scientific and interdisciplinary attitude.

Eindcompetenties

- 1 To have a basic knowledge of international and European marine and aquatic biodiversity law.
- 2 To have the abilities to understand international and European biodiversity law texts and sources.
- 3 To have the attitudes to do self study in international and European biodiversity law.
- 4 To be open minded for concepts of other disciplines (law, environmental ethics and social sciences).
- 5 To be able to give an oral presentation on a topic related to marine or aquatic

biodiversity law.
